

Table of Contents

List of Contributors	v
Preface to the monograph on ECMO for cardiac surgery teams	xiii
1. Prevalence and Trends of Temporary Support in Post-Cardiotomy Adult Patients ..	1
HIGHLIGHTS	1
Introduction.....	1
Contemporary Mechanical Circulatory Support Devices.....	2
Intraaortic Balloon Pump.....	3
Percutaneous Left Ventricular Assist Devices	4
Venoarterial Extracorporeal Membrane Oxygenation.....	5
Conclusions.....	6
References.....	7
2. Data From the ELSO Registry	9
HIGHLIGHTS	9
Introduction.....	9
Methods	10
Results	11
Discussion.....	16
References.....	20
3. Indication, Patient Selection, Implant Timing. The EACTS/ELSO/STS/AATS Position Paper	23
HIGHLIGHTS	23
Introduction.....	23
Document Development	24
Indications i.e. Describe the Criteria for Post-cardiotomy ECMO	24
Lactate.....	25
Patient Selection i.e. Who is Candidate?	25
Implant Timing	26
Contraindications.....	28
Benefits of Prophylactic Preop MCS?	28
Order of Support e.g. IABP First, then IMPELLA vs. ECMO	30
Prognosis.....	31
References.....	32
4. Post-Cardiotomy ECLS in Adult Patients with Congenital Heart Disease	35
HIGHLIGHTS	35
Introduction.....	35
Pathophysiology.....	36
Surgical Intervention.....	36
Extracorporeal Life Support (ECLS).....	36
Management	38
Summary.....	40
References.....	41

5. Circuit Preparation and Features	43
HIGHLIGHTS	43
Introduction.....	43
Biocompatible Components.....	44
Various Bioactive and Biopassive coatings used during ECMO	44
ECMO Circuit for Adult Patients	45
Centrifugal Blood Pumps.....	46
Membrane Oxygenator	48
Cannulas for Adult Patients	51
References.....	54
6. Surgical Access and Configuration - <i>Peripheral Approach: Femoral and Axillary</i>.57	57
HIGHLIGHTS	57
Introduction.....	57
Decision-making Process: When to Choose the Peripheral Approach	58
Factors to be Considered for the Choice of Cannulation Strategy in the OR.....	59
Possible Available Options for Peripheral Cannulation (Femoral vs. Axillary) ...	61
Femoral Cannulation.....	62
Axillary Artery	65
Cervical Vessels	66
Hemodynamic Characteristics and Advanced ECLS Configurations	67
Conclusions.....	68
References.....	69
7. Surgical Access and Configuration - Central (Aorta and Transthoracic)	71
HIGHLIGHTS	71
Introduction.....	71
General Concepts Related to Central Cannulation for ECLS in PCCS.....	72
Considerations Regarding ECLS Support Mode	73
Considerations Regarding Cannula Selection	75
Considerations Regarding the Management of Thoracic Wound Incisions.....	76
Summary	77
References.....	78
8. Surgical Access and Configuration - Complex Patients (aortic dissection, VSD, preop, prophylactic).....	81
HIGHLIGHTS	81
Extracorporeal Life Support in Acute Type A Aortic Dissection.....	81
Extracorporeal Life Support in Post-Infarct VSD (PI-VSD).....	85
Summary	87
References.....	88
9. Surgical Access and Configuration - Alternative Access and Configurations	91
HIGHLIGHTS	91
Introduction	91
Pulmonary Artery Cannulation	91
Cannulas and Catheters.....	96
TandemHeart and Trans-Septal Cannula	96
Impella and ProtekDuo Cannula use with Right Support Devices.....	100

Hybrid and Dynamic Configurations	101
Conclusion	101
References.....	102
10. Surgical Access and Configuration – ECLS Support in Pulmonary Endarterectomy and Acute Embolectomy.....	105
HIGHLIGHTS	105
Introduction.....	105
Chronic Thromboembolic Pulmonary Hypertension.....	105
Acute Pulmonary Embolism and Pulmonary Embolectomy	110
References.....	112
11. Surgical Access and Configuration – ECLS post-VAD or post-HTx	115
HIGHLIGHTS	115
Introduction.....	115
Need and Configuration of ECLS in Patients with Durable Assist Devices.....	117
Primary Graft Failure after Heart Transplantation.....	120
Definition and Classification	120
Risk Factors for PGD.....	121
Donors Factors	121
Recipeint Factors	122
Procedural Factors	123
Prognosis.....	123
Management of PGD	124
Specific Outcome and Configuration of ECLS for Primary Graft Failure	124
ECLS Configuration	125
ECLS Management.....	126
Conclusion	126
References.....	127
12. Alternative Devices for PCCS (pVAD, Impella, IABP...)	129
HIGHLIGHTS	129
Intra-Aortic Balloon Pump	129
IMPELLA	130
BIPELLA	134
References.....	135
13. LV Venting; Yes/No, When, How?	137
HIGHLIGHTS	137
Focus on the Left Ventricle	137
Vent or Not to Vent?	138
Recognize the LV Overload.....	139
Optimal Timing for Venting the Left Ventricle.....	140
How Venting?.....	141
Conservative Strategies	142
Surgical Techniques	143
Percutaneous Techniques	143
References.....	145

14. ICU Management: Hemodynamic monitoring.....	147
HIGHLIGHTS	147
Introduction	147
Tailoring Optimal Extracorporeal Support Flow	150
Preventing Left Ventricular Overload.....	150
Recognizing the Prominent Multifaceted Role of the Right Ventricle	150
Reflecting on Mechanical Ventilation.....	151
Physiology Based Monitoring of VA ECMO.....	151
Conclusions and Future Perspectives	153
References.....	154
15. ICU Management: Anticoagulation.....	155
HIGHLIGHTS	155
Introduction.....	155
Heparin.....	155
Bivalirudin, Direct Thrombin Inhibitors (DTI) ⁷	156
Heparin-induced Thrombocytopenia	156
VA ECMO without Heparin	157
Measurements of Anticoagulant Effect.....	157
References.....	160
16. ICU Management: Patient care and Nursing (open or closed sternum).....	163
HIGHLIGHTS	163
Introduction.....	164
Airway and Breathing	165
Circulation	166
Hemodynamic and Fluid Management	167
Bleeding Risk	168
Hemolysis and Thrombosis	169
Risk for Infections and Temperature Monitoring	169
Disability.....	171
Daily Nursing.....	172
Cannulas Management.....	172
Surgical Wound Management.....	174
Oral Hygiene	174
Abdomen and Nutrition	174
Rehabilitation and Physiotherapy	175
References.....	176
17. ICU Management: Ventilation.....	177
HIGHLIGHTS	177
Introduction.....	177
Physiology of MV during PC-ECLS	178
MV Settings	180
Weaning from MV	182
Summary	184
References.....	185

18. ICU Management: Infection and Septic Shock Management.....	187
HIGHLIGHTS	187
Introduction.....	187
Diagnosis	188
Microbiology	189
Treatment	190
ECMO Management	190
Prevention	191
Conclusions.....	191
References.....	192
19. ICU Management: Fluid and Vaso/Cardiac Active Drugs Management.....	193
HIGHLIGHTS	193
Fluid Management	193
Vaso/Cardiac Active Drugs	194
Adrenergic Receptor Agonists	194
Vasopressin.....	195
Phosphodiesterase III Inhibitor.....	195
Calcium Sensitizer	196
Practical Consideration in the Use of Vaso/Cardiac Active Drugs	196
References	198
20. ICU Management: Risk Model and Prediction.....	201
HIGHLIGHTS	201
Introduction.....	201
Intensive Care Unit Management	201
Risk Model and Prediction	205
References.....	208
21. Complication & Management: Vascular Complications.....	211
HIGHLIGHTS	211
Introduction.....	212
Central Versus Peripheral VA-ECMO in Post-Cardiotomy Shock	212
Vascular Complications	215
Diagnosis and Management of Vascular Complications	217
References.....	221
22. Complication and Management: Bleeding and Blood Disorders	225
HIGHLIGHTS	225
Introduction.....	226
Postcardiac Surgery Mechanisms of Bleeding	226
ECMO-Associated Alterations of the Hemostatic System	230
Post-Cardiotomy ECMO in Newborns and Small Infants.....	231
References.....	232
23. Complication and Management: Neurologic Injuries	235
HIGHLIGHTS	235
Introduction.....	235
Neuromonitoring.....	239
References.....	241

24. Complication and Management: Respiratory	245
HIGHLIGHTS	245
Introduction.....	245
Principles of Protective Mechanical Lung Ventilation	246
Specific Respiratory Complications and Their Management	248
References.....	251
25. Complication and Management: ECPR	253
HIGHLIGHTS	253
Introduction.....	253
Incidence and Outcome of ECLS in the Perioperative/Postoperative Setting....	253
Management of Cardiac Arrest after Cardiac Surgery	254
European Association for Cardio-Thoracic Surgery Guidelines	254
Society of Thoracic Surgeons Expert Consensus	255
ELSO Interim Guideline Consensus Statement.....	255
Conclusion	257
References.....	258
26. Complication and Management: Renal and Gastrointestinal Complications...	259
HIGHLIGHTS	259
Introduction.....	260
Renal Disease.....	260
Fluid Overload	262
Renal Replacement Therapy (RRT).....	262
Practical Suggestions	263
Gastrointestinal Complications.....	264
References.....	269
27. Complications and Management: ECLS System Malfunction	271
HIGHLIGHTS	271
Introduction.....	271
Cannula and Circuit-Related Problems	271
Oxygenator Monitoring	273
Coagulation Monitoring	276
Management of Oxygenator Failure	278
Pump-Related Problems	278
Air in System.....	278
Harlequin syndrome.....	279
References.....	281
28. Complication and Management: Cardiac and Noncardiac Surgical Procedures...	283
HIGHLIGHTS	283
General Considerations: Tips and tricks	284
Cardiac Surgery Procedures.....	287
References.....	291
29. Weaning or Bridge to other devices or HTx: Weaning or De-Escalation (Impella)	293
HIGHLIGHTS	293
Introduction.....	293
Surveillance and Optimal Timing for Weaning	294

De-escalation Strategies and Bridge to Other Therapies	298
Bridge to Bridge and Bridge to Durable LVAD and Heart Transplant	298
References.....	302
30. Weaning or Bridge to other Devices or HTx: Bridge to VAD/BIVAD/TAH/HTx ...	303
HIGHLIGHTS	303
Introduction.....	303
Weaning	304
De-escalation	309
Bridge to Advanced Heart Replacement Therapies	311
Summary	312
References.....	314
31. Venovenous ECMO in Post-Cardiotomy Patients	317
HIGHLIGHTS	317
Introduction.....	317
Suggested Indications for PC VV ECMO:	318
VV ECMO Cannulae and Circuit Configuration	318
Cannulation.....	319
Special Considerations in Bleeding PC Patients.....	320
Anticoagulants for VV ECMO.....	320
VV ECMO Flow Management	321
Drainage Insufficiency	321
Respiratory Management.....	321
Maintaining Adequate Oxygenation on VV ECMO	322
Hypoxia.....	322
Oxygenator Failure	322
Management of Hypercapnia on VV ECMO.....	322
Sedation	323
Muscle Relaxants.....	323
Hemolysis	323
Infection Surveillance	323
Continuous Renal Replacement Therapy	324
Decannulation	324
Post-Decannulation.....	324
References.....	325
32. Ethics and Withdrawal.....	327
HIGHLIGHTS	327
Respecting Patient Autonomy.....	327
Futility and When to Withdraw Therapeutic Care	328
Justice, or the Appropriate Utilization of Resources	330
Recommendations ¹⁵	330
References.....	332
33. Early and Late Outcomes.....	333
HIGHLIGHTS	333
Introduction.....	333
Methods	334

The Goals of PC-ECLS..... 334

What Can We Do to Improve the Outcome of PCCS-ECLS 334

PCCS-ECLS Timing of Implantation: Early Implant, Better Outcome.....336

Good Cannulation – is a good cannulation.....337

Outcome of PCCS-ECLS: Lessons Learned 339

References..... 340
